

God Explains Truth with Truth

Check Out Other References

We want to do all that we can to **see** what God is **saying**, thus we want to check out other references in other *Scriptures* in the Bible to give us further insight. The **YDT App** offers us a couple of ways to do this:

1. The **LOOK** Section has the  sign that leads you to other references for what you are trying to understand, **aka Cross References (CR)**.

TIP: These **Cross References** are not exhaustive, but they will help in your understanding.

- To Open  **Cross References**: Tap the  ;
- To close: tap on the 
- To Open the verse: Tap on the verse of your choice.
- Remember to ask the 5W's and H.
- To Close the verse: Tap anywhere off the purple text box.

2. The **Word Search** is another way to search out other references.

Look for the spy glass  on the right hand side of the upper tool bar. Do you see it?

- To Open: tap on the .
- The **Word Search** window will open in the right hand screen.
- Type in the word you are searching for (only 1 word at a time) e.g. 'joy'.
- Every Scripture that 'joy' is in will appear.
- You might type in 'rejoice', or even 'rejoicing'.

- After searching: tap on the  to clear the search and do another.
- To Close: tap on the **X**.

Isn't this awesome! Right there at the touch of a finger.

Let us share what else you can do with the [Word Search](#).

Consider typing in the word 'heart' to do a [Word Search](#) .

Now let's say out of all these Scriptures [Word Search](#) gave, I want to see the **Gen 6:5** Scripture reference with the word '**heart**' in it's context:

- In the [Word Search](#), tap on **Gen 6:5**.
- **Your Bible** text in the window to the left will open to **Gen 6:5** with the word '**heart**' highlighted in yellow.

TIP: After you have looked at **Gen 6:5**, to get back to the book you were in:

Tap on the back arrow **in the upper Tool Bar**, and your Bible text will return to the book you were in.

TIP: If continuing with another [Word Search](#),

No need to scroll back to the top, just tap on the  in the Search window, and the search window will be cleared for a new search.

To close the [Word Search](#) window: tap on the **X**.

We absolutely love this function! Just way too cool and so wonderful not to have to go in and out to other sites to search.
